

Grade Level Introduction: Second Grade 2020-21

Teacher Contact Information

Sheryl Morgan

BAed K-8, Northwestern Oklahoma University;
Elementary Teaching Certification (TX, AZ);
ACSI Certification; Years Teaching: 26; Years at
CCS: 24

Email: sherylm@casaschristianschool.com

Classroom voicemail: (520) 878-1323

Andi Matak

B.A., *cum laude*, American University of Paris
Elem Ed. Teaching Certified, ACSI Certified
Years Teaching: 8 Years at CCS: 1

Email: andic@casaschristianschool.com

Classroom voicemail: (520) 878-1323

Grade Level Description

Second grade is full of wonder and excitement as the students learn many new skills. Instructionally, we incorporate differentiation and problem-based learning, with a variety of hands on activities which meet or exceed state standards. To achieve this, we often use games, centers, role play, and a variety of activities to keep the learning lively and engaging. This strengthens students' learning, enhances enjoyment, and provides opportunities for higher level learning. All of this is done from a Biblical worldview.

Bible is taught as an independent area of study, but we are constantly exploring how all of our topics reveal the character or nature of God in alignment with Biblical truth. Our aim is to help the children to think "biblically" *while* thinking "critically," rather than viewing the two as separate ways of thinking. This will allow them to be more independent by being wholly dependent upon God to help them grow in social, emotional, spiritual, and academic areas.

Having a school-wide math block allows us the luxury of doing some very specialized ability grouping for mathematics. Our accelerated section moves more quickly through the materials.

We use the Six Traits of Writing model as a foundation for our writing instruction. There are numerous opportunities for students' writing to be celebrated. Students are required to write across genres ranging from poetry, narrative, fiction, summary, to letters.

Units of study in social studies include; U.S. history, government, basic economics, mapping skills, citizenship, history of cultures, famous Americans, landforms and landmarks.

Units of study in science include; the human body systems, plants, animal life cycles, states of matter, and air and weather.

Some of the highlights of second grade are:

Christmas Around the World
Bartering Booths- barter their homemade goods
Human Body Studies
Technology- www.learning.com
Handwriting- learning cursive

Grade Level Resources

Bible: Purposeful Design

Reading/Language Arts/Writing:

McGraw-Hill's Wonders

Math: Go Math! (3rd Grade)

Science: Harcourt Publishers

Social Studies: Harcourt Publishers

Handwriting: Zaner-Bloser

Special Events & Field Trips

Colonial Day
Christmas Around the World
Dollar Tree (Operation Christmas Child)
Slim Goodbody
Arizona-Sonoran Desert Museum
Science Fair
Fire Safety with Golder Ranch
Electrical Safety with TEP
Water Conservation Day
CYT Performances
